

How do Snoreeze Lozenges work?

Snoreeze Lozenges target the main cause of snoring. Their dual action formulation tones and lubricates the soft tissues at the back of the throat to provide effective snoring relief.

Taking Snoreeze Lozenges is simple

For best results do not eat or drink after taking Snoreeze Lozenges. More than one Snoreeze Lozenge may be taken, but usually a single Lozenge is sufficient.

Precautions

For oral use only. Keep out of reach of small children. Store in a cool, dry place below 25°C. Snoreeze Lozenges should be taken at room temperature. Snoreeze recommends that if you are pregnant or breastfeeding you should contact your doctor before use. Excessive consumption may cause laxative effects.

Please note

There is no guaranteed 'cure' for snoring. However, Snoreeze Lozenges can relieve the symptoms of snoring to help provide a peaceful night's sleep for you and your partner. Snoreeze Lozenges are not a cure for sleep apnoea (a related respiratory medical condition). You may be suffering from sleep apnoea if you stop breathing during sleep, wake-up tired or fall asleep easily during the day. If you experience any of these symptoms it is recommended that you consult your doctor.

Ingredients

Xylitol, spirulina, acacia gum, microcrystalline cellulose, citric acid, glucosamin sulphate, menthol, sage extract, sodium hyaluronate, colloidal silica, magnesium stearate, grape seed extract.
